An **Examiner's Amendment** to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this Examiner's Amendment was given in a telephone interview with Mr. Mario Cloutier, on 3/17/2005.

**Examiner's Amendment to the Claims**

In claim 1(d), line 3, after "wherein the", delete polypeptide" and substitute therefor --- fragment ---.

In claim 12(b), line 3, ", delete polypeptide has kinase activity." and substitute therefor --  
- fragment has kinase activity;

the method comprising culturing the host cell of claim 5 under conditions in which the nucleic acid molecule is expressed. ---.

In claim 18, line 1, delete " a compound that selectively hybridizes with a nucleic acid" and substitute therefor --- the ---.

**Examiner's Amendments to the Specification**

In page 7, line 12, delete "Figure 1 depicts" and substitute therefor --- Figures 1A-1M depict ---.

In page 7, line 26, delete "Figure 3 is an" and substitute therefor --- Figures 3A-3K display ---.

The following is an **Examiner's Statement of Reasons for Allowance**:

Claims 1-7, 12 and 18 are directed to isolated nucleic acid molecules from the group consisting of : DNA molecules comprising a nucleotide sequence having at least 95% identity to those encoding a myotonic dystrophy type PK (MDPK 13245) kinase of specific amino acid composition, wherein the polypeptide encoded by said molecules has kinase activity, DNA molecules comprising fragments of at least 1400 nucleotides of nucleotide sequences encoding said MDPK kinase, wherein the polypeptides encoded by said nucleic acid molecules have kinase activity and DNA molecules encoding a fragment of a polypeptide comprising at least 1000 contiguous amino acids of said MDPK kinase wherein said fragment retains kinase activity as well as kits comprising all said DNA molecules.

Nucleotide sequences encoding said MDPK kinase are free of prior art. Further, the prior art does not teach or suggest preparing such specifically claimed sequences. Hence said DNA sequences are also non-obvious. Since said nucleotide sequences are both novel and non-obvious, DNA molecules comprising sequences having 95% identity to said novel and non-obvious nucleotide sequences capable of encoding kinase, DNA molecules comprising fragments of at least 1400 nucleotides of said novel and non-obvious nucleotide sequences, wherein the polypeptides encoded by said nucleic acid molecules have kinase activity and DNA molecules encoding a fragment of the expression product of said novel and non-obvious nucleotide sequences wherein the fragment comprises at least 1000 contiguous amino acids of said ATM kinase wherein said fragment retains kinase activity as well as kits comprising all said DNA molecules are also novel and non-obvious.

**Claims 1-7, 12 and 18 are allowed.**

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
